## PARTNERSHIP WITH COLTRACO

*September 2021 Newsletter*

BREAKWATER INTERNATIONAL is excited to announce its partnership with COLTRACO Ultrasonics, the lead manufacturer of ultrasonic instrumentation and monitoring systems. The Portalevel® Max Marine and Portasteel® Calculator will help you to cross-verify liquid level contents with agent mass calculations. With these tools, you are able to identify cylinder fill weight (level + mass) and save the reports and data. COLTRACO products such as the Portalevel® Max Marine, are ideal for those who want the best liquid level indicator to protect their fleet. This will allow you to be in compliance with IMO SOLAS FSS Code for marine fixed gaseous fire extinguishing systems at sea, on vessels and offshore installations. COLTRACO's mission is to help you deliver the Safesite® and the Safeship® to improve safety for your people, assets and infrastructure on land and at sea. For more information, please email us at [california@bkwint.com](mailto:california@bkwint.com).
